

**HANEFLEX (S) PTE. LTD.**

亨伐私人有限公司

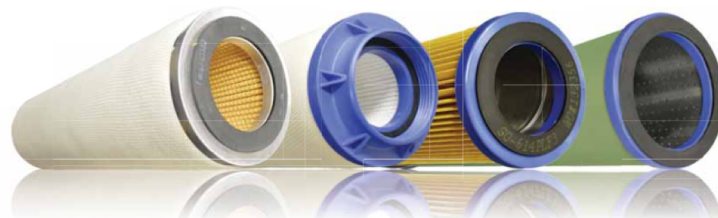

**SERVICE & QUALITY FIRST**

SPECIALISTS IN THE SALES & SERVICE  
OF AVIATION & PETROLEUM  
FUEL HANDLING EQUIPMENT SINCE 1980.

# Parker Velcon Filters

Parker Velcon is the industry leaders for aviation fuel filters including :

- Filter Water Separator
- Micronic Filters
- Filter Monitors
- Clay Filters
- Filter Vessels
- Fuel Condition Monitoring Instruments

# Eaton Carter Ground Fueling

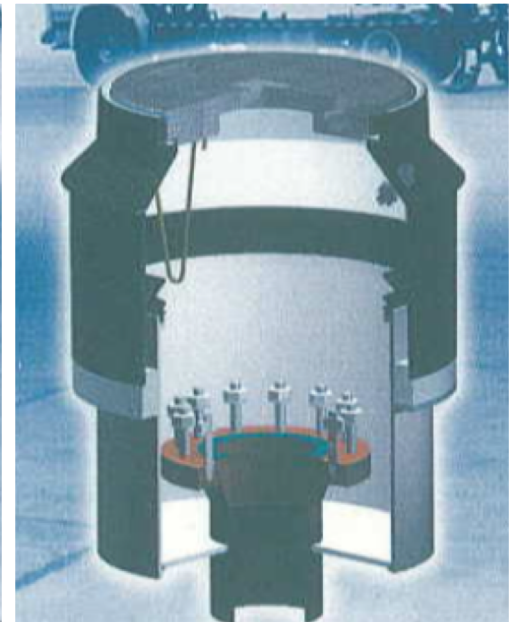

Eaton's Carter Ground Fueling Division is a manufacturer of high quality EI-qualified airport ground fueling components:

- ◆ Hydrant Pit Valves
- ◆ Hydrant Couplers
- ◆ Refuelling Nozzles
- ◆ Pressure Control Systems
- ◆ Breakaway Couplings

# Hydrant Pit Boxes

- We offer pit boxes for hydrant valves as well as high/low points in both steel and polyethylene construction in 18" & 24" diameters as well as single or double wall configurations, depending on the make and model.

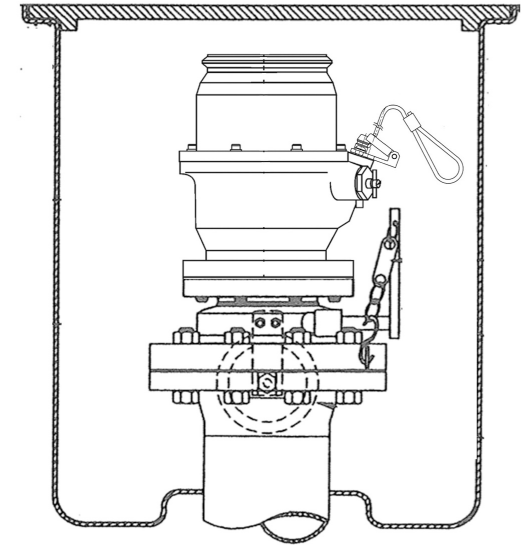

# Gammon Technical Products

Gammon is a leading manufacturer of aviation ground fueling components and accessories :

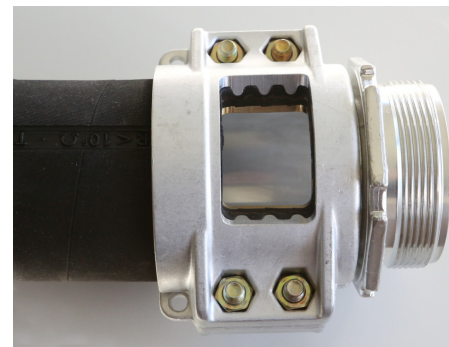

- Under-hydrant Emergency Shut-off Valve
- Tank Floating Suction Assemblies
- Differential Pressure Gauge
- Flow-Rate Meters
- Mini Monitor Kits
- Grounding Cables & Reels
- Additive Injectors

# Elaflex

Elaflex manufactures hose & end-couplings suitable for Aviation application

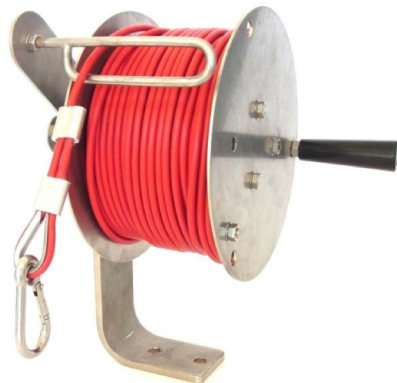

- Into-Plane & Intake Hoses
- Defuelling Hoses
- Riser Hoses
- Couplings
- Expansion Joints
- Pipe Fittings

# Aljac Fueling Components

Aljac manufactures various fueling components, notably :

- Close Circuit Samplers
- Mobile Product Recovery Tanks
- Bonding & Lanyard Cable / Reels

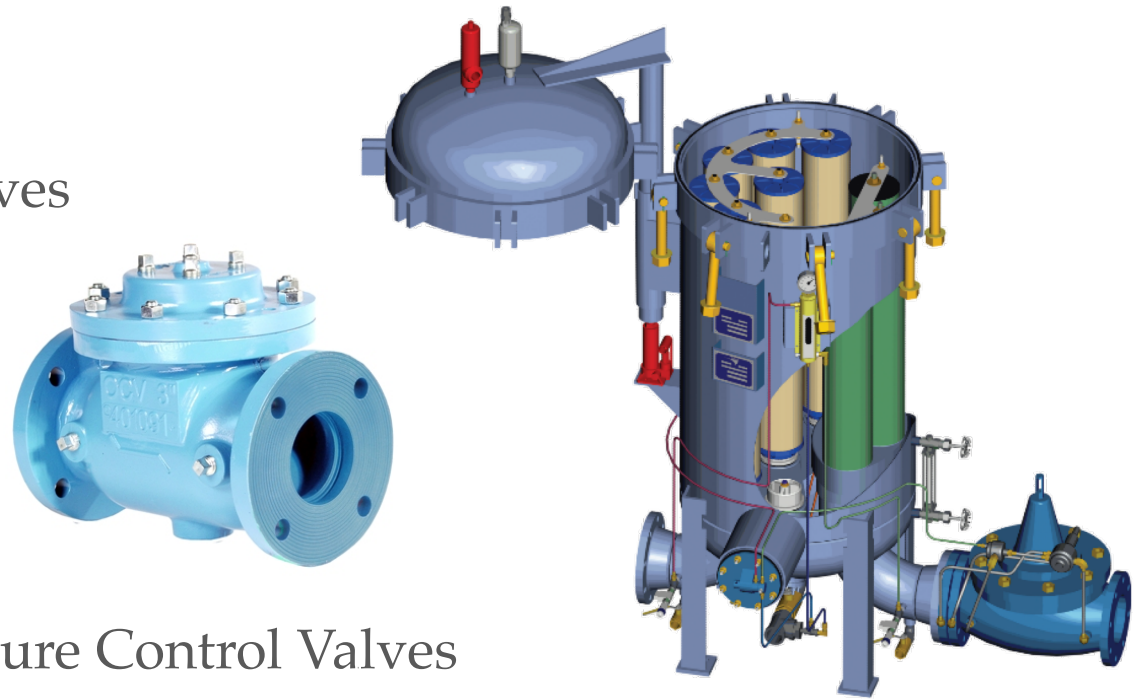

# OCV Control Valves

OCV Control Valves provide automatic control valves in fueling distribution and transfer applications including tanks, metering systems, filtration systems, loading terminals & truck loading / unloading. Here are types of control valves used at airports :

- High Level Shut-Off Valves
- Filter Separator Control Valves
- Float Pilots
- Hydrant Control Valves
- Non-Surge Check Valves
- Pressure Relief / Back Pressure Control Valves

# Young Engineering

Young Engineering is a leader in the surge control industry offering the largest size range surge vessels designed to control hydraulic transients.

Products include:

- 💧 Bladder Surge Tanks
- 💧 Bladder Surge Arrestors
- 💧 Pulsation Dampeners

# TCS Meters

Total Control Systems specializes in providing both reliable liquid measurement and recording equipment that is Weights and Measures approved (NIST, OIML, NMI, MID, and SABS).

- 💧 Piston Meters
- 💧 Rotary Meters
- 💧 Electronic Registers

# Scully Signal Company

Scully's core systems include overfill prevention, static ground proving, retained product monitoring, water detection, and vehicle identification and communication.

# Gilbarco Veeder-Root

GVR provides a complete solution for retail and commercial fuel dispensing systems :

- Fuel Dispensers & Pumps
- Submersible Pumps
- Fuel Management Systems
- Tank Gauging Systems
- Leak Detection Systems

# Fuelco Tanks

- Modular and portable in a standard ISO container profile.
- Dual-skin allows for leak containment. No need for external bund walls.
- Can be manifolded to expand capacity.
- Optional pump bay for integrating Pumps, Dispensers, FMS & ATG
- Drop-&-Go Service Station.

# Emcee Electronics

Emcee Electronics manufactures high quality instruments to measure electrical conductivity, water separability and filterability of explosive liquids :

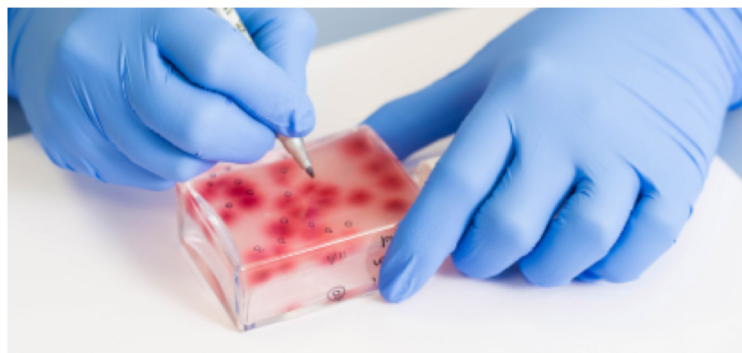

- 💧 Conductivity Meters
- 💧 Micro-Separometer
- 💧 Micro-Filter Analyzer
- 💧 Staticon Monitoring & Control System

# ECHA Microbiology

ECHA Microbiology has been helping organisations to solve their microbiological contamination and corrosion problems for more than 30 years. This include test kits for detecting :

- Microbial contamination in fuels, oils and associated waters.
- Sulphate Reducing Bacteria (SRB), which can cause pitting corrosion in tanks.
- Nitrite Reducing Bacteria (NRB), which can affect the efficiency of corrosion inhibitors.
